## Business Voice / IP Telephony

- All destinations billed pure per second
- No minimum call charges on any call type
- Telephone Management System (TMS) access
- Geographic Number Porting.
- Proactive monitoring by dedicated NOC
- In-house Helpdesk & Support

**Computel BusinessCall service offering allows clients to replace their existing legacy infrastructure with modern SIP Trunking-Technology whilst ensuring that clients are reliably connected to the network at all times**

Our **BusinessCall** solution makes use of innovative voice over IP (VoIP) technologies to transmit voice calls over a broadband data connection. The solution also takes advantage of un-contended IP network to ensure that all calls, between a client's PBX and the Computel Network, are of the highest quality.

**BusinessCall** offers a low cost, high quality IP based voice telephony service that enables you to make and receive telephone calls to and from customers, partners and suppliers on their landlines or mobile phones, whether they are based locally, nationally or internationally.

**BusinessCall** provides a carrier grade solution delivering calls end-to-end over a Next Generation IP network. The solution integrates seamlessly with traditional PABX's enabling a phased migration to a full IP solution if and when required. IP Voice provides companies with a host of benefits, including unrivaled scalability, wide breadth of features and lower cost of ownership. The offering is available in a range of options to suit any sized business.

Cloud email exchange account

Fully managed file sharing

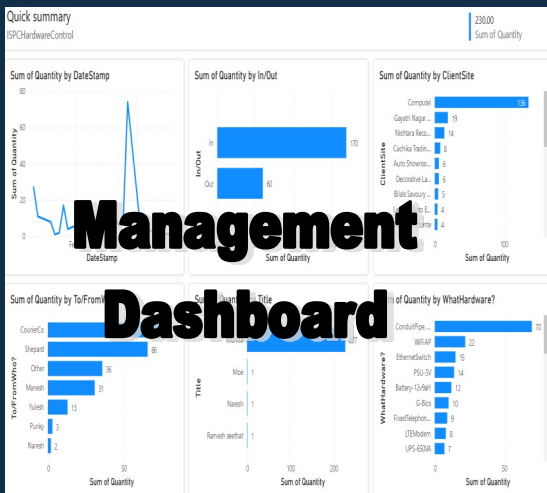

No expensive on-site servers & huge software development costs

Access information from anywhere

The screenshot displays the 'ISPCHardwareControl' dashboard. At the top, there's a navigation bar with options like 'New', 'Edit in grid view', 'Share', 'Export', 'Automate', and 'Integrate'. Below this is a table with columns: Title, DateStamp, ClientSite, WhatHardware?, Quantity, and In/Out. The table lists various hardware items like 'Battery-12/9Ah', 'Cartridge', 'FixedTelephone09', and 'Kaspersky' with their respective quantities and statuses.

Overlaid on the table is the text 'Mobile Apps'. To the right, two smartphone screens are shown. The left one displays 'My Available Balance' with 'Used' and 'Remaining' amounts. The right one shows a 'Leave Type' selection screen with 'Holiday' selected and date pickers for 'Start Date' and 'End Date'.

At the bottom, a 'Sharing settings' dialog is open, showing a list of folders and files. The 'Name' column lists folders like 'ComputelManagement', 'CustomersMSIP', 'FinanceAppMotordeal', 'Human Resources', 'KooverjeeAssociates', 'Management', 'Nares', and files like 'A RATE SHEET.pdf', 'BIA Fibre CPE configuration\_V5 Fe...', 'ECN SAF - Porta One Sep22.pdf', and 'The CRM Team Reciprocal NDA C...'. The 'Modified' column shows dates from August 15, 2022, to October 26, 2022. A 'Share' menu is open over the 'ComputelManagement' folder, showing options like 'Share', 'Copy link', 'Download', 'Delete', 'Rename', and 'Pin to top'. The 'Share' option is selected, showing a list of sharing options: 'Anyone', 'People in ISP COMPUTel', 'People with existing access', and 'People you choose'. The 'Anyone' option is selected.
